

Answer to *The choice of a life*

Dear girl, you are not the only girl in this situation and I will try to help you. The average of the girls above 18 years old who will be pregnant is around 2% and above 19 years old is 8%. First, if you are at the school, the MSSS (Ministère de la santé et des services sociaux) supports the young parents, so you can receive money. It's alright to not work. Second, you should be sure that your boyfriend is the good one because if not, you will have regrets. The last question you have to ask at yourself is if you are ready to educate a child. If you are not sure, you can give him in an adoption center. A lot of adults are not able to have kid so it's propably sure that someone will give him all the love he needs. Give me feedback of your decision.

Dr. Julien.
