

I feel so lonely and I'm scared

Dear doctor problem,
I'm little, fat and i have acnee. Because of this, I don't have any friend. Most of people do not look at me and act as if I was invisible. Since three weeks, my situation became worst . A group of popular students started screaming me names and laugh at me. If only this would stopped there. Last week later, at lunch time, they surrounded me. I could not go anywere, I was stuck. One of them pushed me on the others ,they started to push me back and forth and to hit me until I felt on the floor. I fell so humiliated, I didn't know what to do. There was so many poeple arround , but nobody came to help me. Everybody seemed to enjoy the show.

Now, I feel so lonely. I really don't know what to do. I avoid this group at school, but couldn't do this until the end of the year. I tried to talk about it with my father, but he said that I was not a real man and that was why everybody was making fun of me. He doesn't understand my situation. I don't know what to do. You must help me! I really don't know what to do..
