

I Hate Flu!!!

Our Advice:

Hi Lucien Pablo,

We are the Team of Dr. Nerdz to help people who are scared or having mental problems.

First, you have to fight your fear. You can separate the garbage at the dump. That place is not really clean so you will get used to be with billions of bacteria. You will develop antibodies and it will help you to be safe from the H1N1 influenza. After complete this step go jump to second one. In public places, you won't be scared of door handle because you did step 1. You will not be contaminated if you just wash your hands before meals. Nobody has been eaten by bacteria up to now.

Trust yourself and people will stop laughing at you.

Good luck Lucien Pablo!

Sincerely,

Team of Dr. Nerdz
